

XC Network Connect

# F5 Distributed Cloud

XC App Connect

SaaS-based platform that enables seamless and secure connectivity across hybrid and multi-cloud environments

Connect and secure app to app communications across one or more public, private and edge environments

## Network and Application Connectivity in one Distributed Platform as-a-Service

Deploy connectivity in hours, not months

Multi-Cloud-Networking

Cluster-to-Cluster Site-to-Site

API Discovery, Analytics & Protection

Service Insertion (FW)

Secure L3 fabric

Secure K8S Ingress Controller

L3-L7 networking

F5 Global Network, Internet or private network

Datacenter to Cloud Edge to Cloud Cloud to Cloud

Secure Application Delivery to private or public environments

End-to-End Service Observability

DISTRIBUTED CLOUD CONSOLE (SaaS PORTAL)

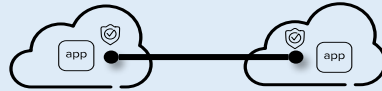

### F5 DISTRIBUTED CLOUD NETWORK CONNECT

Network-centric approach augmented with network security

An L3 VPN fabric that simplifies your cloud interconnectivity

### F5 DISTRIBUTED CLOUD APP CONNECT

Application-centric approach augmented with application security

A distributed ADC fabric that makes your apps look like they are local

Customer Edge

Regional Edge

Customer Edge

Cloud agnostic

Central management

Ease of use

API integration

**Networking / NetOps**  
Connect networks between sites

**DevOps / Platform Ops**  
Connect applications and publish services to users
