

Automated Remote Access Solution

OVERVIEW

Combis ARA is a comprehensive, in-house developed product designed to streamline remote access processes for organizations. This innovative solution consists of four distinct modules, each addressing critical aspects of remote access management

KEY FEATURES

Customizable Approval Process

Session Recording

Automated Remote Access

Remote Access Rule Hygiene

Infrastructure Management

Modules

1.

APPROVE

Customizable Approval Process

Approve module automates the entire approval process, ensuring flexibility to adapt to your organization's specific workflows. It seamlessly integrates with existing processes, reducing manual intervention and accelerating remote access requests.

- Customizable workflows
- Integration with existing systems
- Streamlined approval management

2.

ACCESS

Infrastructure Automation

Access module automates the entire infrastructure chain required for remote access, including active directory, MFA, Firewalls, VPN, and Application Gateway Solutions. It ensures secure and efficient access to your organization's data and services.

- Centralized infrastructure management
- Multi-factor authentication support
- Firewall and VPN integration

3.

RECORDING

Session Recording

Recording module allows you to record all remote access sessions to your privileged services and data. It enhances security, accountability, and compliance by providing detailed session logs and recording for internal administrators and external partners.

4.

HYGIENE

Rule Management

Hygiene module ensures the cleanliness of remote access rules across your infrastructure. It identifies and cleans out-of-date rules in systems such as active directory, MFA, firewall, VPN, and application gateway solutions, optimizing resource utilization and reducing IT team workload.

- Rule and policy management
- Resource optimization
- License cost reduction

BENEFITS

- Increased productivity
- Enhanced security and compliance
- Streamlined remote access processes
- Reduced IT workload
- Cost optimization
- Easily scales to meet growing organizational needs

LICENSING OPTIONS:

Combis ARA is available under two flexible licensing models.

PERPETUAL LICENSE:

Acquire Combis ARA through a perpetual license and gain full ownership of the product. This option is ideal for larger organizations seeking predictability in upgrade and update costs. Implementation and setup services for the entire system are included in the initial pricing.

SUBSCRIPTION LICENSE:

Opt for accessing Combis ARA through a subscription-based license, where all system upgrades and updates are included, and you pay only for what you use. Implementation and setup services are also available.

VOICE OF THE CUSTOMER:

Combis ARA has transformed our remote access management. It has simplified our approval process and provided us with a unified solution for secure remote access.
